WORK EXPERIENCE

Associate IT Consultant
Mivada Technologies Pvt Ltd

08/2024 - Present   *Hyderabad*
Custom-fit consulting and IT solutions.
Achievements/Tasks

- Executed end-to-end development of the Western Sydney Airport Card Management System, architecting a secure, scalable backend using Spring Boot and Spring Security.
- Implemented core authentication and authorization features, enhancing system security and compliance.
- Collaborated with QA, DevOps, and product owners to deliver features on schedule, adhering to client requirements.
- Actively participated in code reviews to ensure high-quality standards and improve team productivity.
- Managed ongoing support, maintenance, and change requests, improving system availability and reliability.

Full Stack Developer
Axlr Data

03/2024 - 07/2024   *Hyderabad*
Custom eCommerce platforms for diverse clients
Achievements/Tasks

- Developed and maintained multiple custom eCommerce platforms, enhancing site performance and user experience through optimized frontend and backend code.
- Integrated secure payment gateways and product management modules, increasing transaction success rates.
- Conducted thorough bug analysis and troubleshooting to improve platform stability and reduce user-reported issues.
- Collaborated with designers and backend developers in agile teams to rapidly deliver new features.

Software Engineer
Artemis Network

09/2021 - 02/2024   *Bangalore*
Early-stage crypto startup building decentralized solutions
Achievements/Tasks

- Spearheaded development of decentralized applications in an early-stage crypto startup, building responsive UIs with React, Angular, and Vue.js.
- Designed and implemented RESTful and GraphQL APIs with Node.js and Express.js, optimizing data fetching and server performance.
- Developed cross-platform mobile apps using Flutter, delivering smooth and engaging user experiences on iOS and Android.
- Automated backend processes with asynchronous programming and cron jobs, increasing system efficiency.
- Collaborated closely with blockchain engineers to integrate decentralized features into the platform.
